

FACILITIES

Clinic

The Home enjoys the facility of having its own pharmacy which is stocked by well-wishing doctors who donate medicines and vitamins which is administered by a stay-in nurse-aide.

Laundry

The laundry which was set up by us a few years ago is used to wash curtains and bed linen and clothes of a very little children.

Library

There is a large library with a huge collection of valuable books. There is also a junior library for the children which is used on a daily basis. The culture of reading has been slowly inculcated in the children.

Computer Literacy

We have 2 computer laboratories. One is in the Main Complex which was set up by one of our members who is a qualified ICT Consultant. The other laboratory is in the Boys' Wing which was funded by the German Embassy. The senior children make use of the laboratories for their school projects. Currently efforts are being made to upgrade both the computer laboratories.

Sewing & Handicraft

All children are taught needlework in batches and the older children are taught tailoring after school hours. The Sewing and Handicraft Centre is well equipped with 12 sewing machines.

Bread-making

Bread is baked twice a week at our in-house bakery for the consumption of our children and staff.
